

Weekly Report

Yuxin Ma

05.06.2013 - 05.12.2013

Reading

This week I read chapter 4 of the textbook about fundamentals of information visualization and followed the courseware of our course in last year in order to train myself to think of problems in a way of visualization which I lacked in conscious training.

Skills

After several day's surveying I decided to use Pandas as the in-memory storage engine. I read the manual of Pandas and tried to write some demo programs to test features and performance.

Research

I will hand in an additional report on the future projects.

Miscellaneous Work

None.

Plan for Next Week

- Make detailed action plan for the future projects if possible;
- continue investigating Pandas.
